NEW! DIB-307 Active Direct Box

- Die-cast aluminum chassis for incredible strength.
- No-compromise electronics for world-class performance.
- Automatically switches from 9-volt battery (included) to **phantom power** when phantom power is present.
- Boost guitar and bass signals up to Line Level for direct-to-mixer connections via either Low-Z or Hi-Z inputs.
- "Amp-In" feature allows your amplifier's speaker output to feed the console. Now your amplified sound can go directly into the console without time-consuming microphone selection and placement.
- Ground-Lift Switch breaks "ground-loops", reducing 60-cycle hum.

Page 2.

PHB-265 SWITCHABLE, 48-Point Bay. **Front-panel switches** select Full-Normalled, Half-Normalled or De-Normalled operation for each channel! Page 15.

FREE TECHNICAL SUPPORT:

Not sure which cable to use for a particular application? Just give us a call on our toll-free line and ask for technical support. We want to do whatever it takes to make sure you get the right product!

DBK-415	DIN8(M) to DIN8(M), Mac Compatible 15 ft.	\$12.00

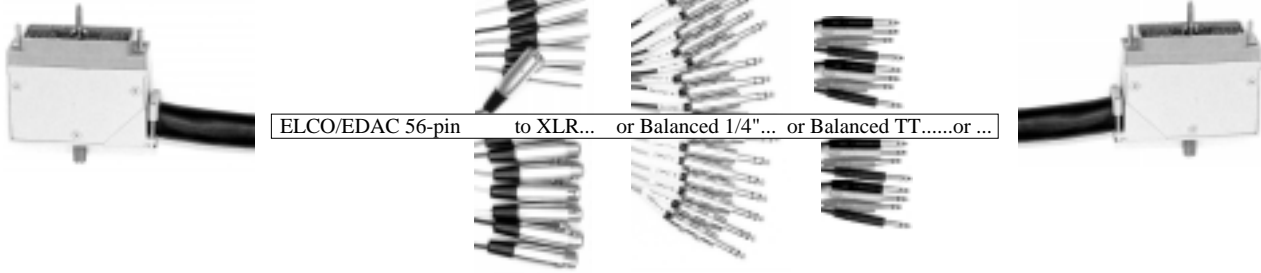

SBC-195 is a Sound Blaster-compatible MIDI interface cable for PC sound cards. It uses the joystick I/O port of the sound card, and it features a female 15-pin connector so that you can keep the joystick connected. MIDI connections are female, so you'll need to add 2 MIDI cables of appropriate length.

FOR YAMAHA MU-5, MU-50, KORG X5-DR, O5RW, NS-54, ROLAND PMA-5 and other modules.

FOR SOUND-CARD AUDIO & MIC CABLES, SEE PAGE 15.

-------	-------------	----------------

SEND / RETURN (INSERT) CABLES:

Modern mixing consoles use "Insert" jacks that allow you to break into the signal path to add an outboard signal processor (reverbs, delays, etc...) using just one cable, which connects to both the input and output of the device. Simply choose the cable below that has the correct terminations (at the dual end) to match your outboard processor.

TRANSFORMERS

To run a low-impedance XLR-terminated line (like a pro microphone) into a high-impedance 1/4" Phone input (like a guitar-amp input), it's often necessary to use a line-matching transformer like our MIT-435 or MIT-176. The MIT-129 is for impedance matching of a high-impedance 1/4" Phone-equipped source (like an electric guitar) into a low-impedance (mic-level) XLR-type input.

MIT-129

Low-Z XLR male to Hi-Z 1/4" Phone Female

MIT-435

Low-Z XLR Female to Hi-Z 1/4" Phone Male

MIT-176

MIT-129	MIC INPUT TRANSFORMER (HIGH Z to LOW Z)	\$19.95
MIT-435	MIC INPUT TRANSFORMER (LOW Z to HIGH Z)	\$19.95
MIT-176	MIC INPUT "Pigtail" TRANSFORMER (LOW Z to HIGH Z)	\$25.00

NEW

**HEM-331
Hum Eliminator**

Designed to eliminate “ground loop” problems, such as AC hum or buzz and/or pop noise in any audio system. Use it to convert between balanced and unbalanced lines. Features include: Pure audio transmission; 1/4” Tip-Ring-Sleeve (TRS) phone jacks for inputs and outputs; Ground lift switch; No external power needs; Rugged steele enclosure.

NEW

**SLW-333 AUDIO SIGNAL
SELECTOR**

Switch back and forth, noiselessly, between up to three powered monitors. The versatile design has 1 IN (source) to 3 OUT (destination), but can be used in reverse to give you 3 IN (multiple sources) to 1 OUT (a single destination). The SLW-333 provides 1/4” Tip-Ring-Sleeve (TRS) Phone Jacks for easy connecting. No power required. Rugged metal enclosure.

NEW

SLW-333	AUDIO SIGNAL SELECTOR, 1 IN TO 3 OUT, OR 3 IN TO 1 OUT	\$99.00
HEM-331	HUM ELIMINATOR WITH GROUND LIFT	\$85.00

**TT -SINGLE CABLES (TT to 1/4”,
TT to TT, TT to XLR (M or F)**

***THESE BALANCED CABLES ARE WIRED PIN-2-TO-TIP, PIN-3-TO-RING. TO ORDER THE OPPOSITE, ADD '3' TO THE MODEL NUMBER. EXAMPLE: STX-105F3.*
